

## Product Overview

V series not only inherits the advantages of the X series on functions and operating performance, but also supports installation of loader and provides fully automatic testing function; It's about half the dimension and weight of the X series to decrease the floor area sharply; Ultra-fast speed, high precision and batch testing are all available.

## Basic Information

<b>Product number</b>	V8/V12	<b>working environment</b>	Open type
<b>electricity demand</b>	220v	<b>Control method</b>	Full-Automatic/Semi-Automatic
<b>Product Size</b>	V8: 800mmW*850mmL*1900mmH V12: 1000mmW*1250mmL*1900mmH	<b>equipment weight</b>	V8: 650kg V12: 1000kg

## Technical characteristics

### Primary Options

- Supports installation of loader and provides fully automatic testing function
- High EMI shielding upper protective cover / standard upper protective cover
- Single/dual-arm robotic automatic loading system
- Chuck: room/high/low temperature
- Virtual tabletop rapid lifting function, manual quick release of test samples
- Chuck X/Y axis manually controllable movement
